1. Introduction

The GerCards system was developed to manage the request and authorization of services on ships through digital documents called "cards." This manual provides detailed instructions on how to use the various features available in the system, aiming to facilitate the users' workflow.

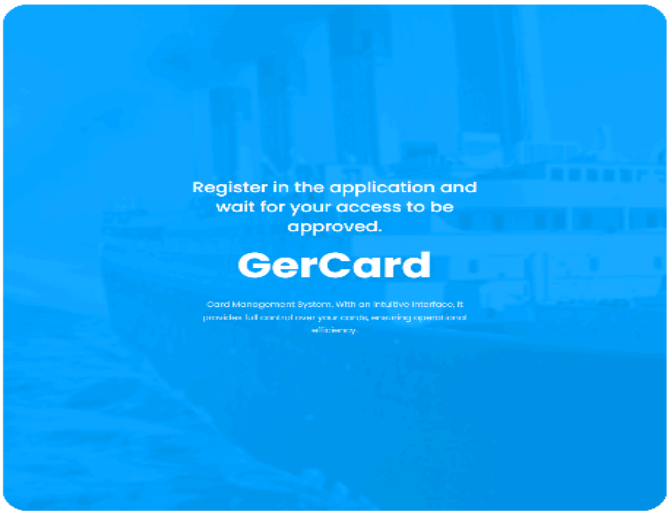

2. System Access

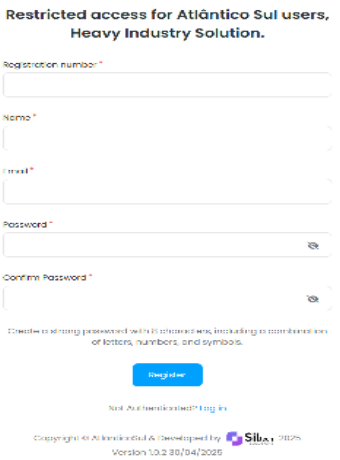

To access the GerCards system, you must log in using a username and password.

If you do not have access credentials, click the Register link on the home screen. Registration is not automatically approved due to the need for intervention by the team responsible for user registration and access approval. You must contact us via email at comercial@easbr.com.br, providing the company name and the ships for which you are requesting access authorization.

3. Registrations

The system allows the registration of companies, ships, units of measurement, and users with different access profiles, when accessed with an administrator account.

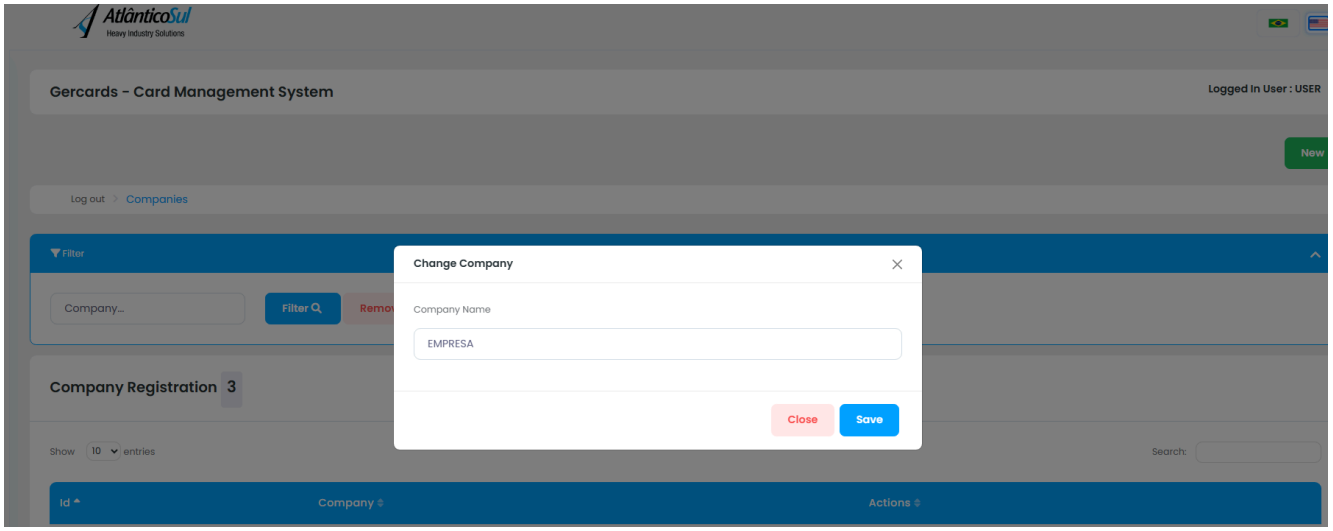

3.1 Company Registration

Only the administrator user can register a new company. To do this, go to the **Registration** menu → **Companies**, click on **"New"**, enter the company name, and click **"Save"**.

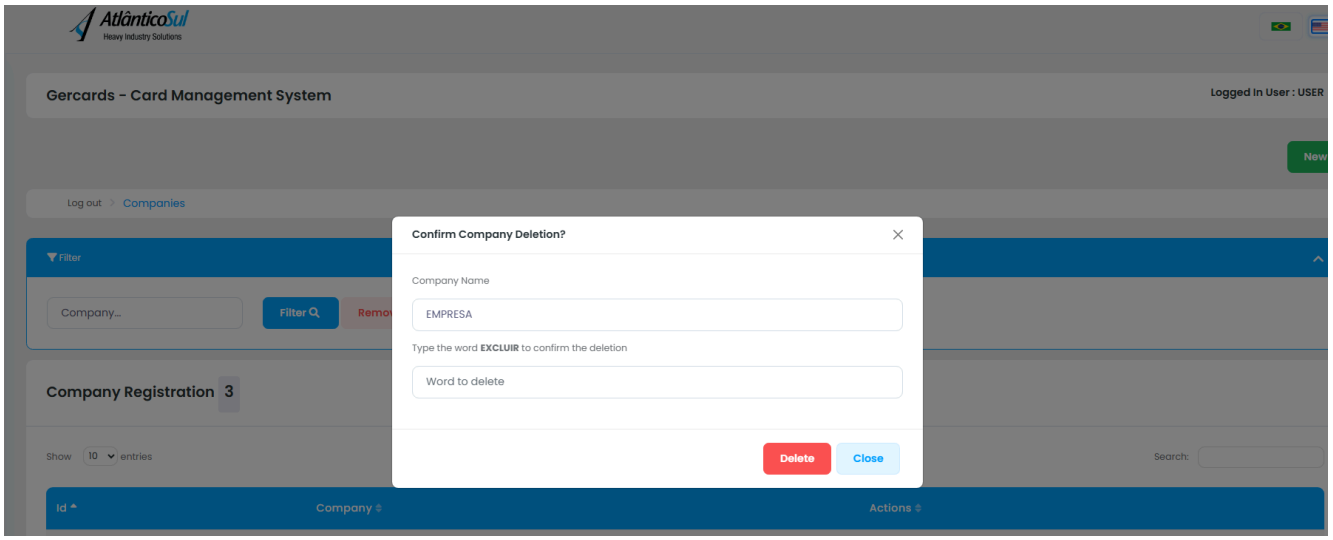

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

- **Edit Company:** Only the administrator user can edit a company. Go to **Registration** → **Companies**, select a record from the company list, and click the **edit** icon. Make the necessary changes and click **"Save"**.

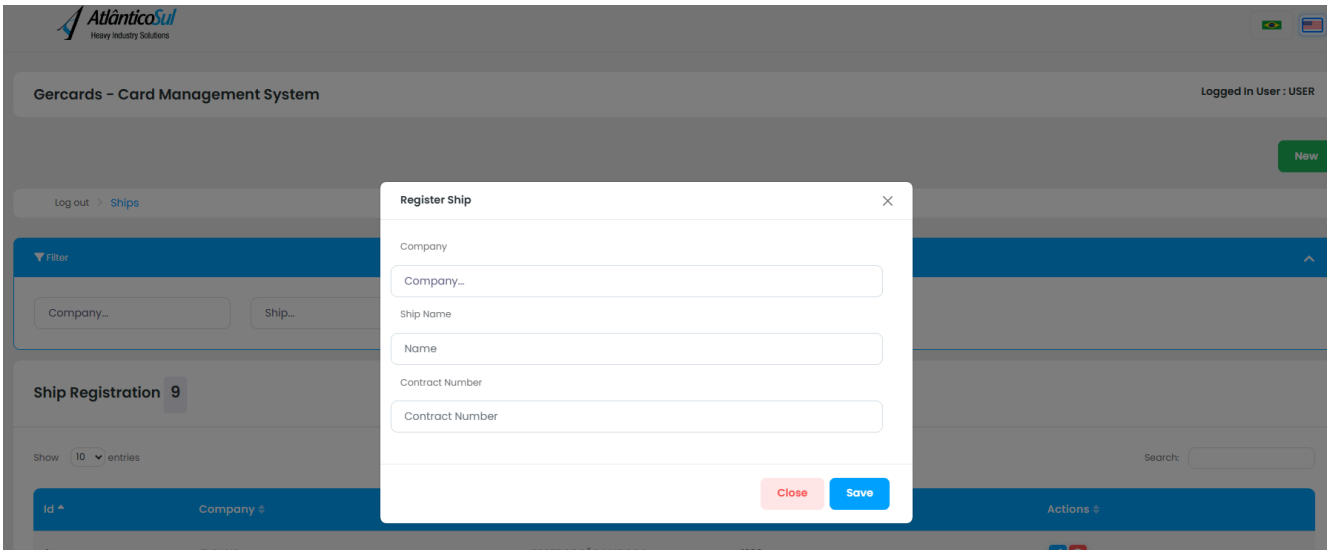

- **Delete company:** To delete a company, go to *Registration -> Companies*, select the desired record, and click the delete icon. Confirm the deletion by typing the word **DELETE** and click "Delete".

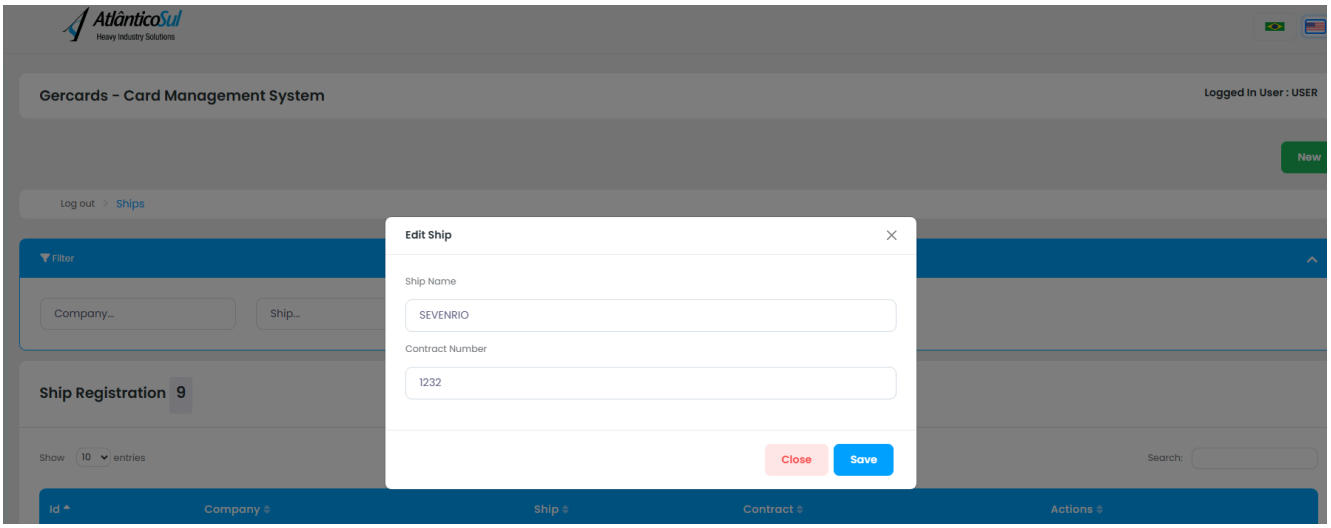

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

3.2 Ship Registration

Only the administrator user can register a new ship. Go to *Registration* -> *Ships*, click "New", select the corresponding company, enter the ship's name, and click "Save".

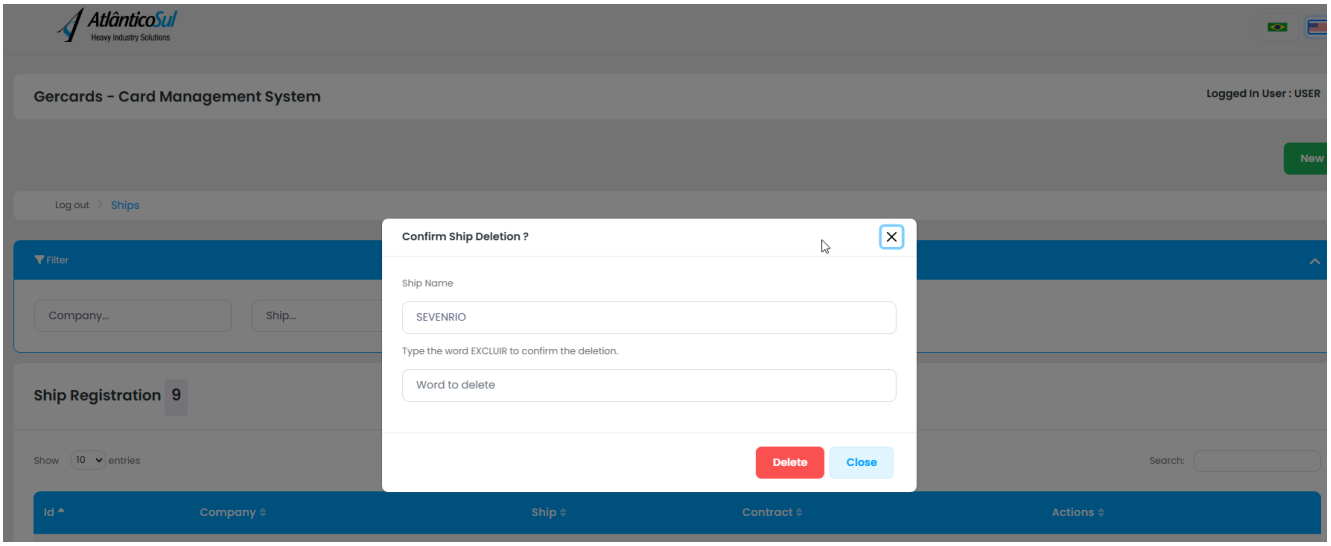

- **Edit ship:** To edit a ship, go to *Registration* -> *Ships*, select the ship from the list, and click the edit icon. Make the necessary changes and click "Save".

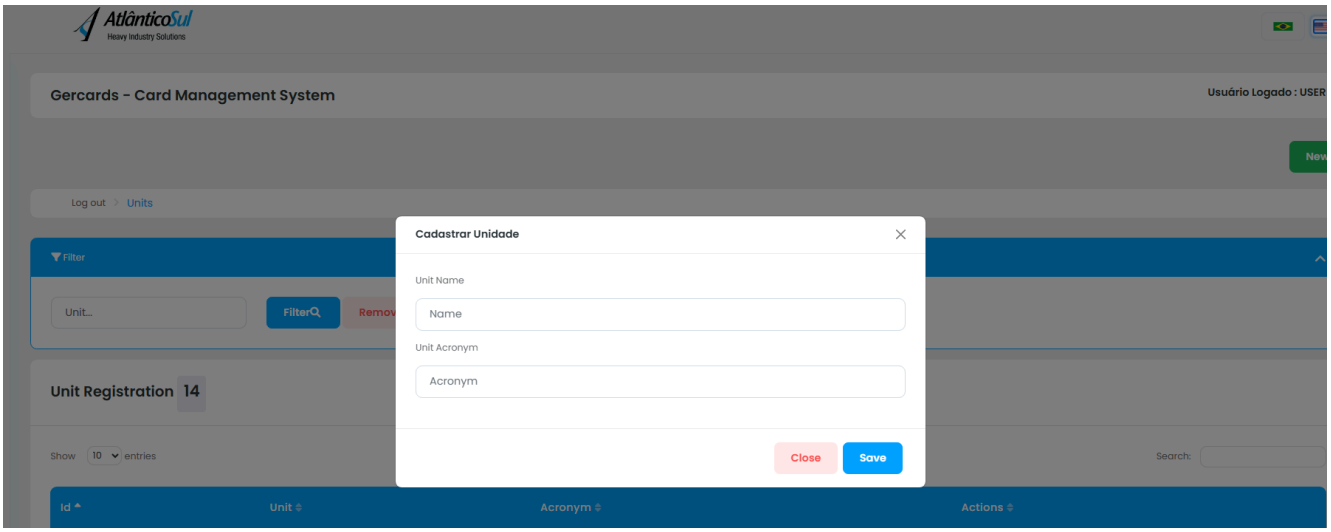

- **Delete ship:** To delete a ship, go to *Registration* -> *Ships*, select the desired ship, and click the delete icon. Confirm the deletion by typing the word **DELETE** and click "Delete".

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

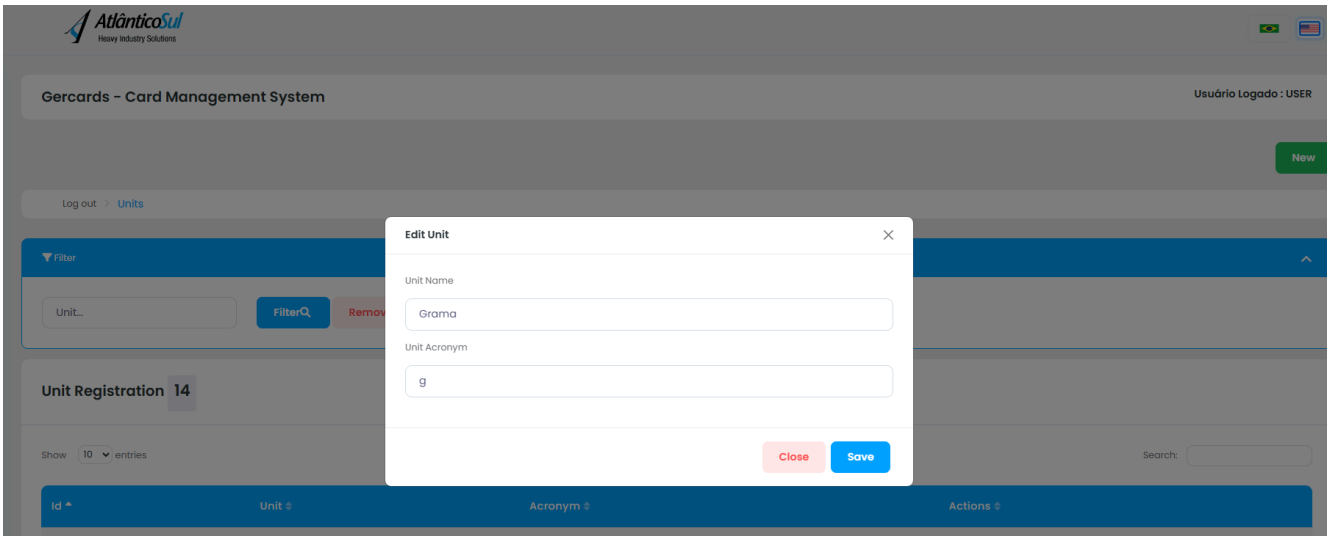

3.3 Unit of Measure Registration

Only the administrator user can register a new unit of measure. Go to *Registration* -> *Units*, click "New", enter the unit name and its abbreviation (up to 5 characters), and click "Save".

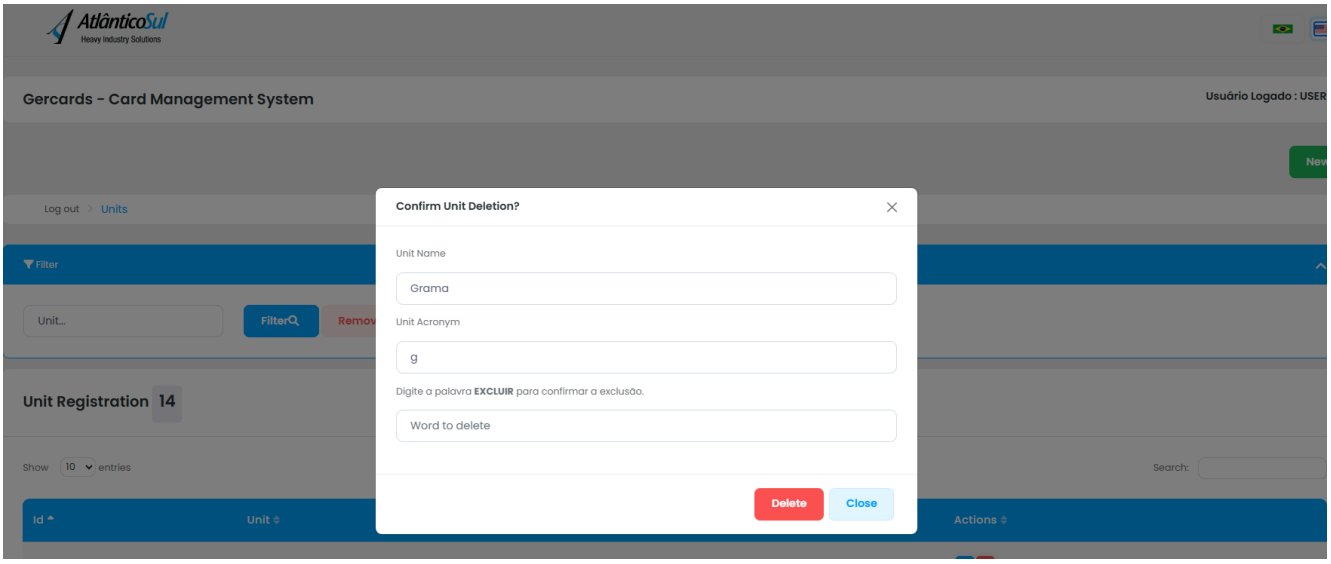

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

- **Edit unit: To edit a unit of measure, go to *Registration* -> *Units*, select the unit from the list, and click the edit icon. Make the necessary changes and click "Save".**

- **Delete unit:** To delete a unit of measure, go to *Registration* -> *Units*, select the desired unit, and click the delete icon. Confirm the deletion by typing the word **DELETE** and click "Delete".

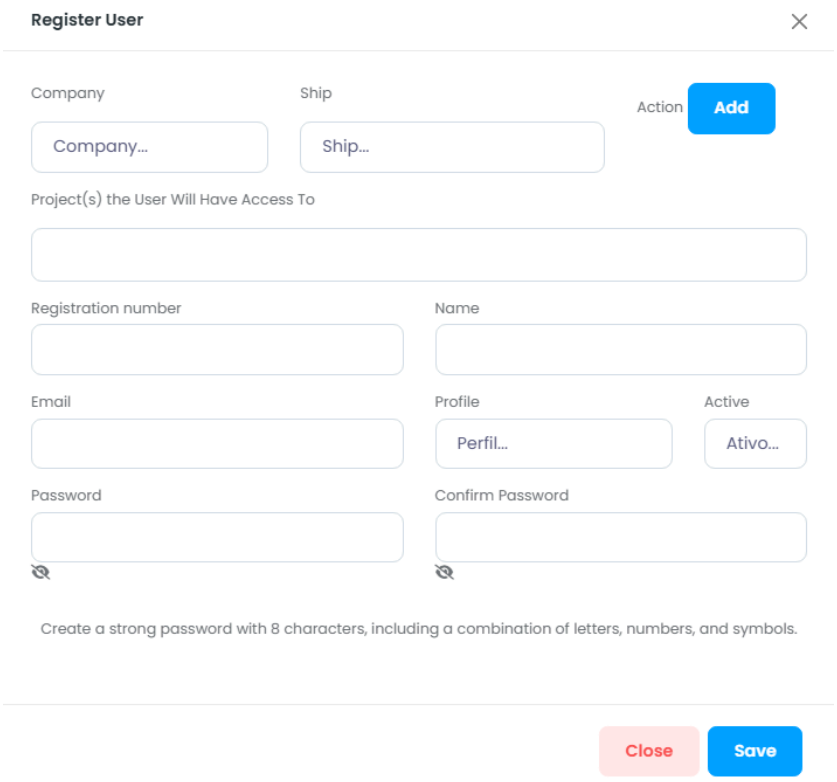

3.4 User Registration

User registration can be performed by the administrator or by the user themselves through the registration link on the system's homepage. However, when the user registers through the homepage, they must request authorization.

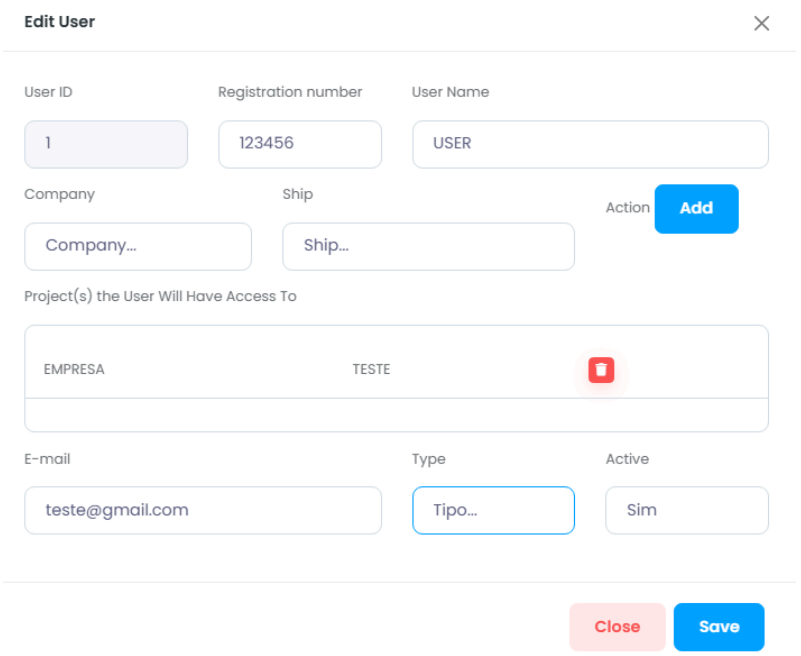

- **Register user:** Go to *Registration* -> *Users*, click "New", enter the company the user will belong to, select the associated ships, fill in the registration number, name, email, access profile, active/inactive status, and password (8 characters with letters, numbers, and symbols). Click "Save".

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

- You must add the project you wish to be part of (company and ship).)

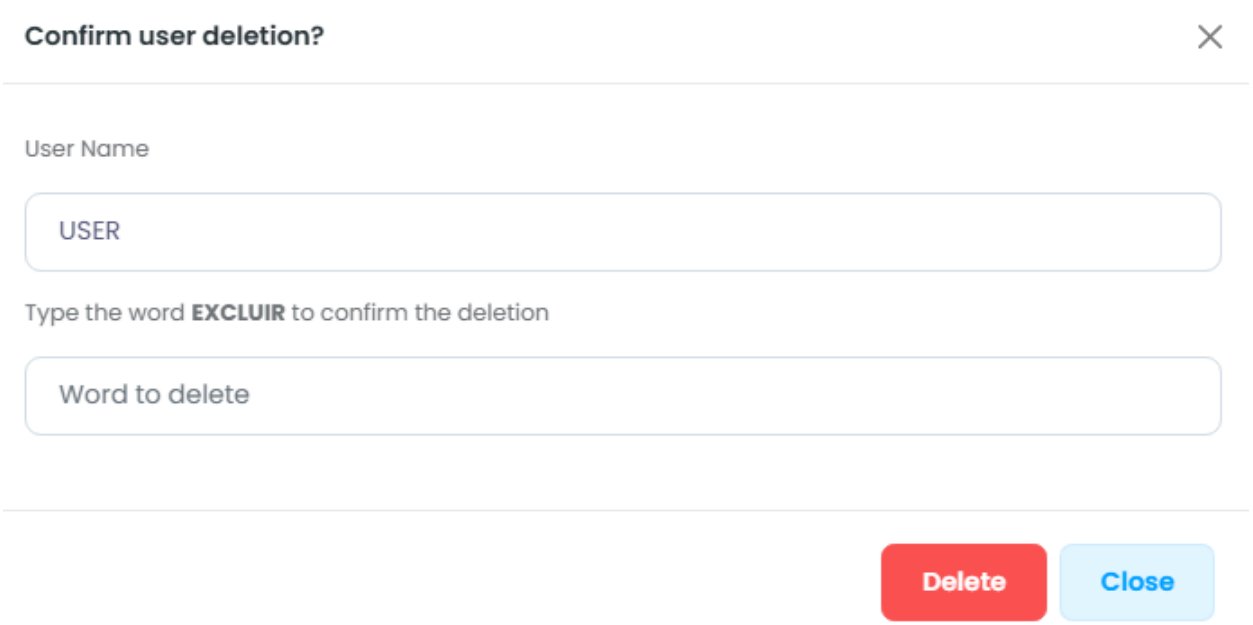

- **Edit user:** To edit a user, go to *Registration* -> *Users*, select the user from the list, and click the edit icon. Make the necessary changes and click "Save".

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

- **Delete user:** To delete a user, go to *Registration* -> *Users*, select the desired user, and click the delete icon. Confirm the deletion by typing the word **DELETE** and click "Delete".

3.5 User Profiles

The profiles are: System Administrator, Card Subscriber, Card Viewer, and Card Issuer.

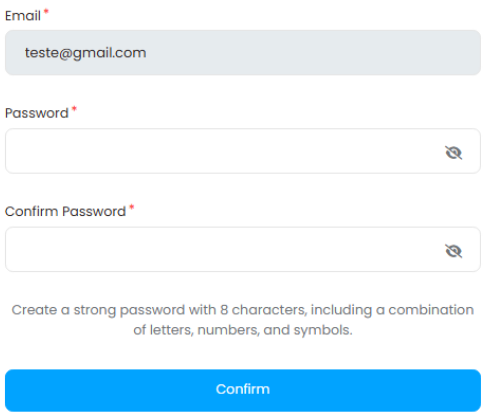

4. Main Features

4.1 Access Control

The system ensures that each user has access only to the functionalities allowed by their profile.

4.2 Password Change

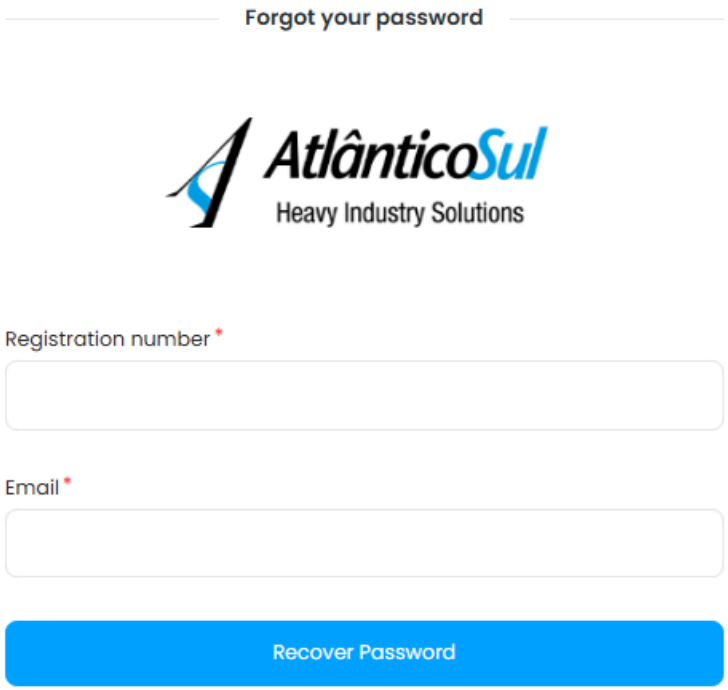

Users can change their passwords after authentication in the system by going to Settings -> Change Password.

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

4.3 Forgot My Password

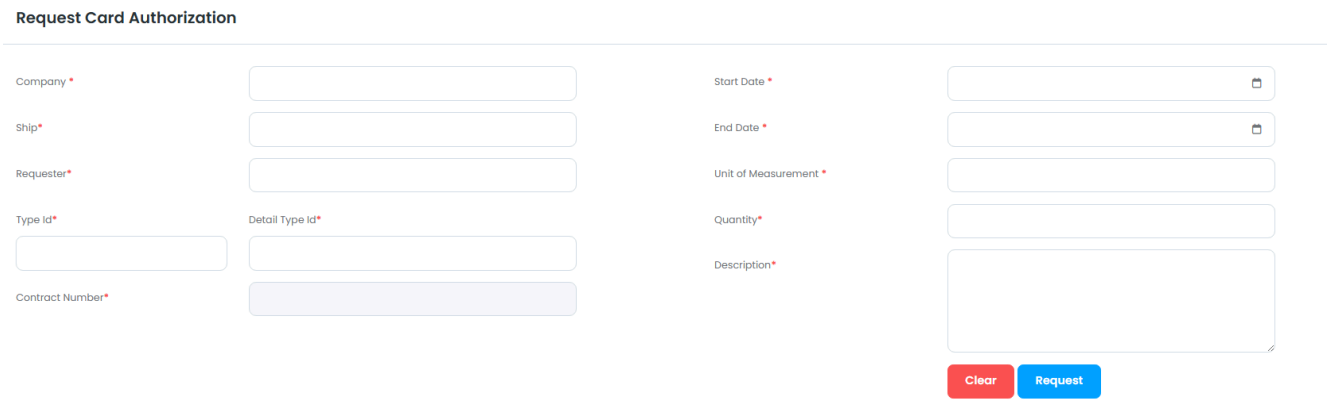

In case of forgotten password, the user can recover it by providing their registration number and email. An email will be sent with a password reset link valid for a specified period.

4.4 Request Cards

To request a new Card, go to *Services* -> *Request Card Authorization*, fill in the required fields such as company, ship, requester, ID type, ID detail type, contract number, start and end dates, unit of measure, quantity, and description. Then, click "Request".

After requesting a Card authorization, the project subscriber (company/ship) will receive an email regarding the need for their signature.

Dear USER,

EASBR informs you that card **A-Exterior-012** has been generated and requires your signature.

To complete the signing process, click the link below or copy it into your browser.

When redirected to the system, enter your access credentials.

Click here to access the signing system.

Card Information

Requester	USER
Requested on	11/05/2025 00:40:47
Detail	1 COPO
Unit of Measure	1 (Copo)
Contract	123
Company	EMPRESA
Ship	TESTE
Start Date	01/06/2025
End Date	01/06/2025

For further information, please contact EASBR or send an email to comercial@easbr.com .

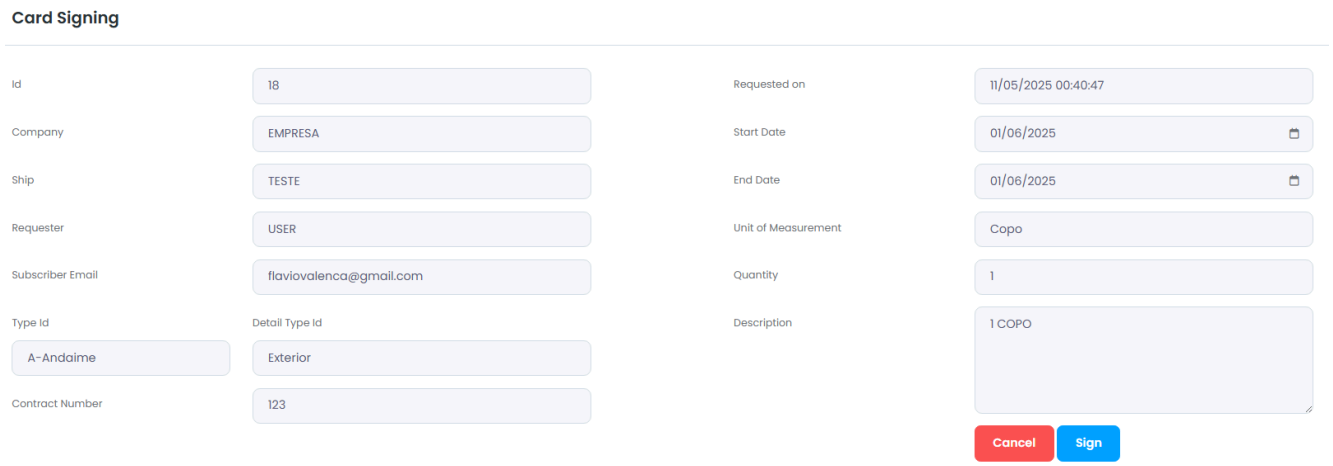

Sincerely,

EASBR Team

4.5 Sign Card

The Card subscriber receives an email to sign the issued Card. The signature is performed using the DocuSign platform. After selecting the Card to be signed and clicking on the "Action > Sign Card" menu, the user is directed to the data review and signature confirmation screen. After clicking the "Sign" button, the user will be redirected to the DocuSign platform, where they must start the signing process by clicking the "Start" button. Next, they must choose their signature and finally click "Finish".

After signing, the user is redirected back to the GerCards platform, where they can view or download the signed Card.

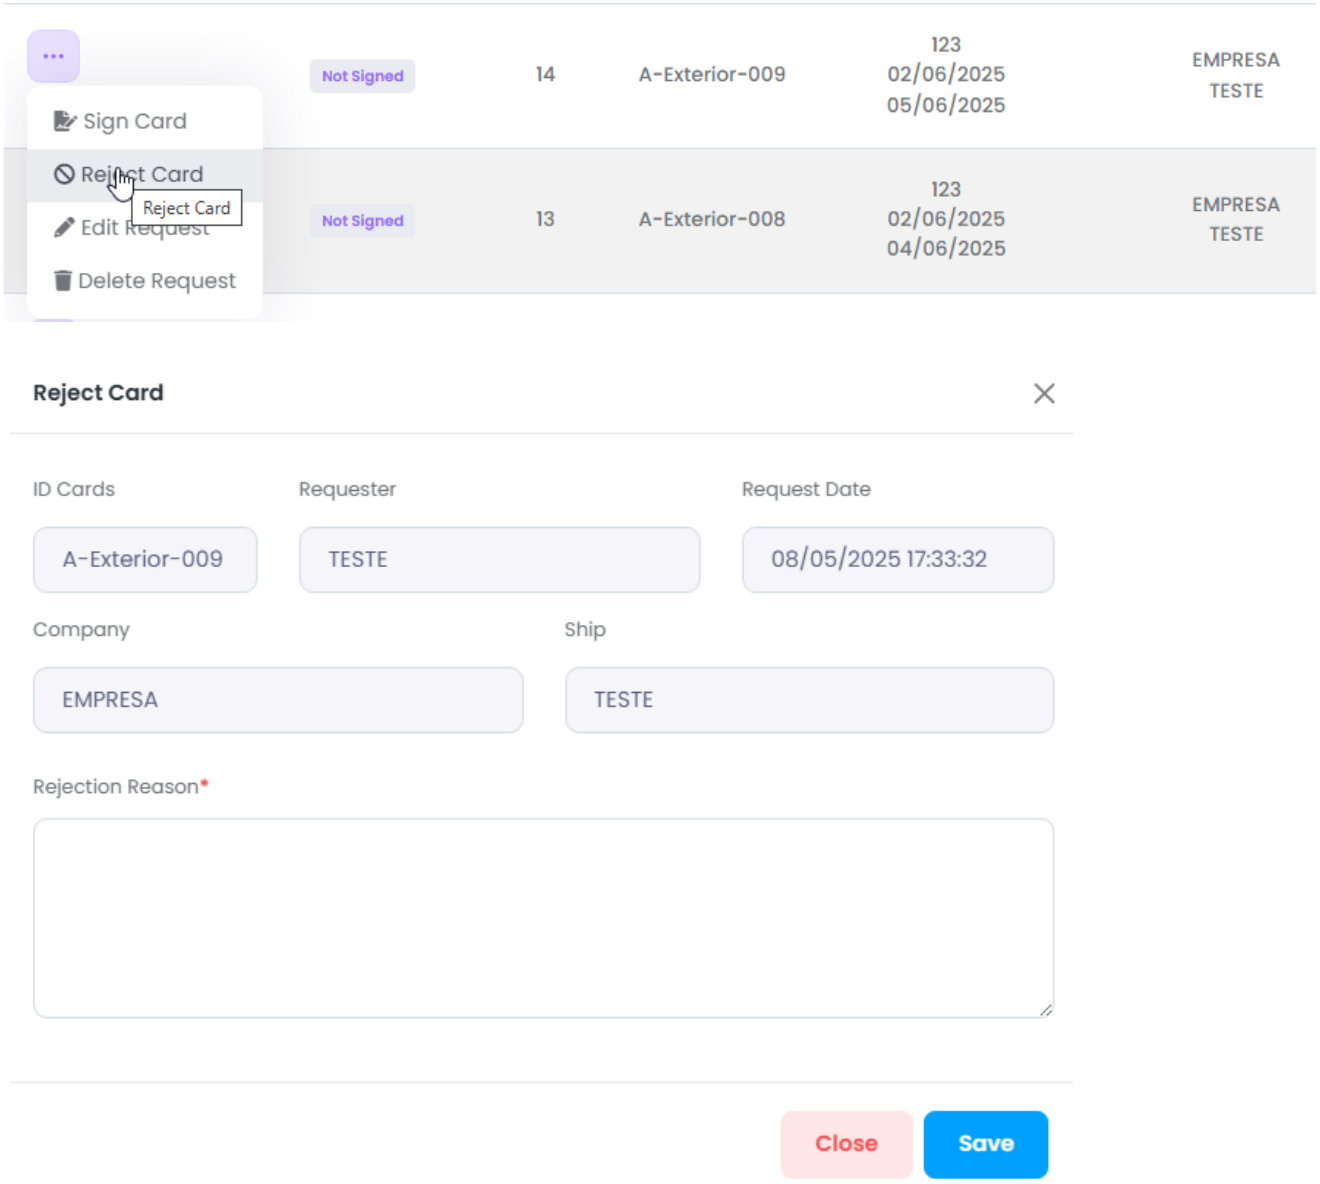

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

4.6 Card Rejection

Authorized users can reject Cards. Once rejected, Cards can no longer be edited. The user must access **"My Cards"**, select the Card they wish to reject, and click on the **"Reject Card"** option.

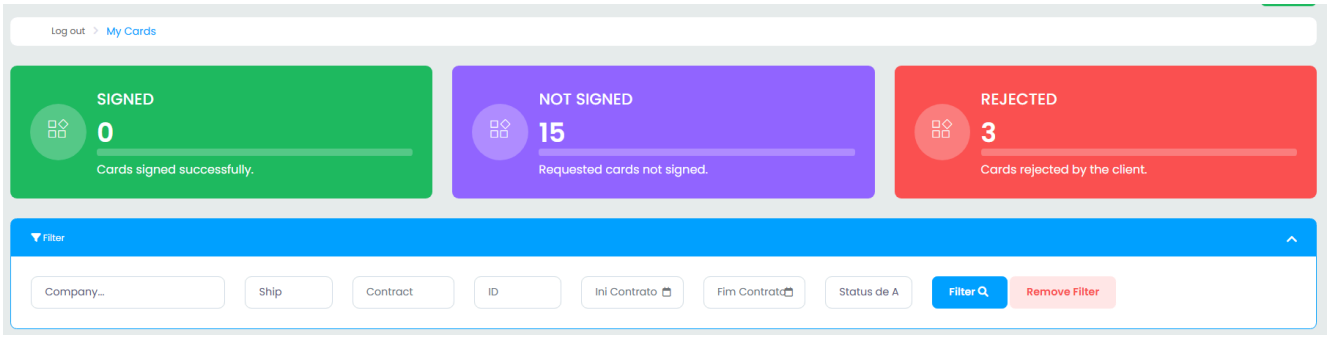

Next, provide the reason for the rejection and click **Save**. The requesting user will then receive an email notifying them of the Card rejection. Rejected Cards can no longer be edited or deleted.

4.7 Track Card

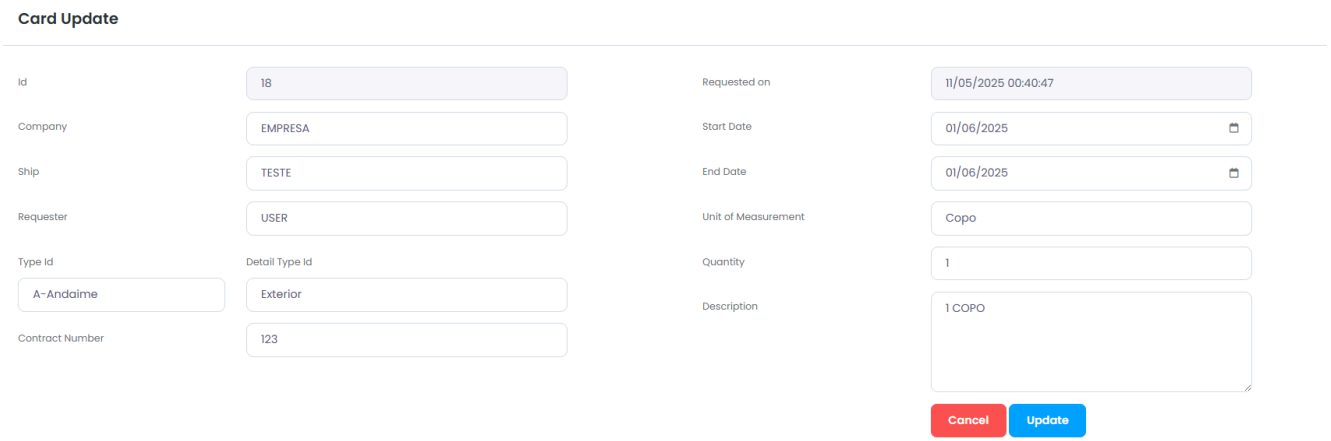

It is possible to track the status of Cards using filters such as company, ship, ID type, ID detail type, and request date by accessing **Services** → **My Cards**.

Actions	Status	N.	Id	Contract	Company	Requester	Quantity	Unit	Request
...	Not Signed	18	A-Exterior-012	123 01/06/2025 01/06/2025	EMPRESA TESTE	USER	1.000	Copo	Requested on 11/05/2025 00:40:47 NOT SIGNED
...	Not Signed	14	A-Exterior-009	123 02/06/2025 05/06/2025	EMPRESA TESTE	TESTE	1.000	Grama	Requested on 08/05/2025 17:33:32 NOT SIGNED
...	Not Signed	13	A-Exterior-008	123 02/06/2025 04/06/2025	EMPRESA TESTE	TESTE	1.000	Pinta	Requested on 08/05/2025 17:30:05 NOT SIGNED
...	Not Signed	12	A-Exterior-007	123 04/06/2025 07/06/2025	EMPRESA TESTE	FLAVIO	10.000	Homem Hora	Requested on 07/05/2025 19:52:13 NOT SIGNED

4.8 Edit Card

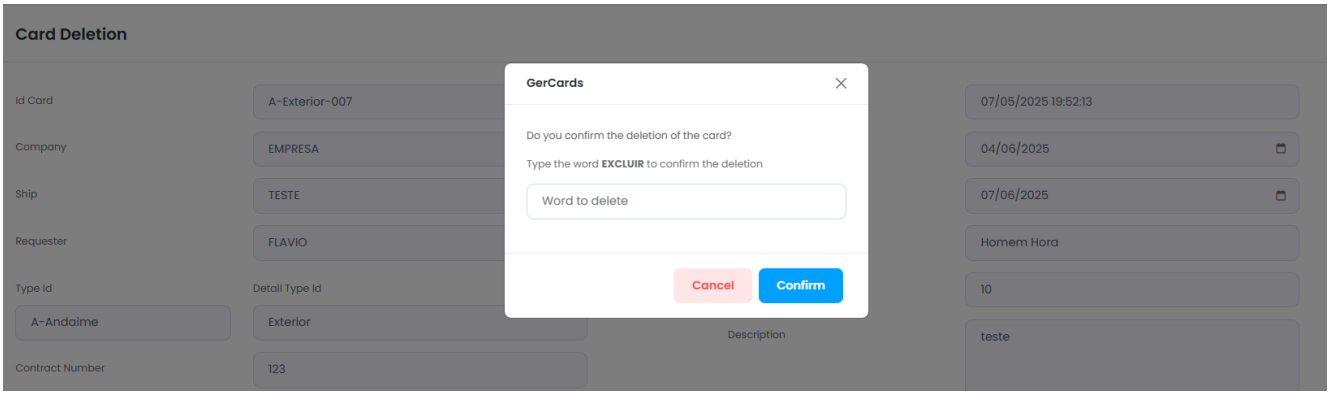

Before rejection or signing, the Card information can be edited by authorized users. The user simply selects the Card they wish to edit and, through the **"Action"** menu, chooses the **"Edit Request"** option. The user will then be redirected to the update screen, where they can modify the desired information and click the **"Update"** button.

Copyright © AtlânticoSul & Desenvolvido por Siltech IT SOLUTIONS 2024

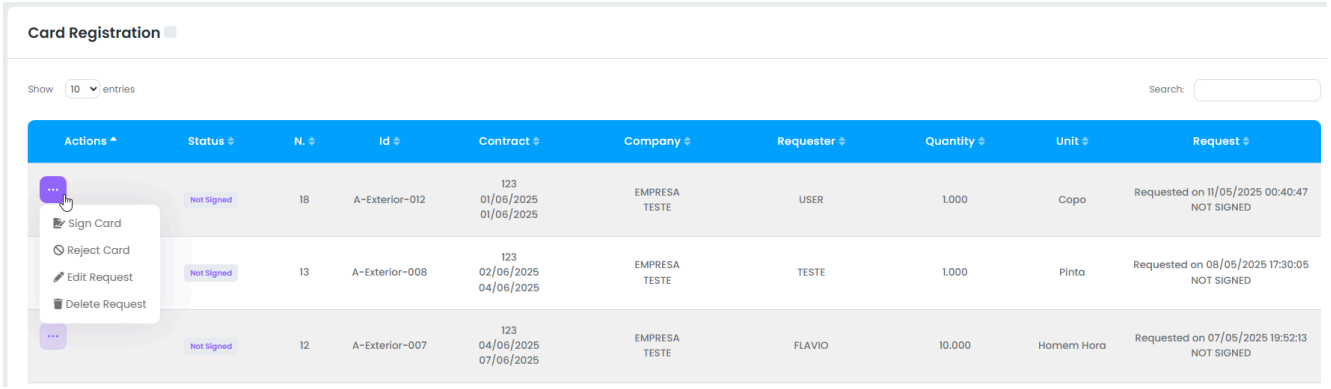

4.9 Delete Card

Card deletion can only be performed by the system administrator, ensuring control over the records. To delete, you must access **"My Cards"**, then click **"Delete Request"** in the **"Action"** menu, where the user will be redirected to a confirmation screen. During confirmation, the word **EXCLUIR** (in uppercase) must be entered.

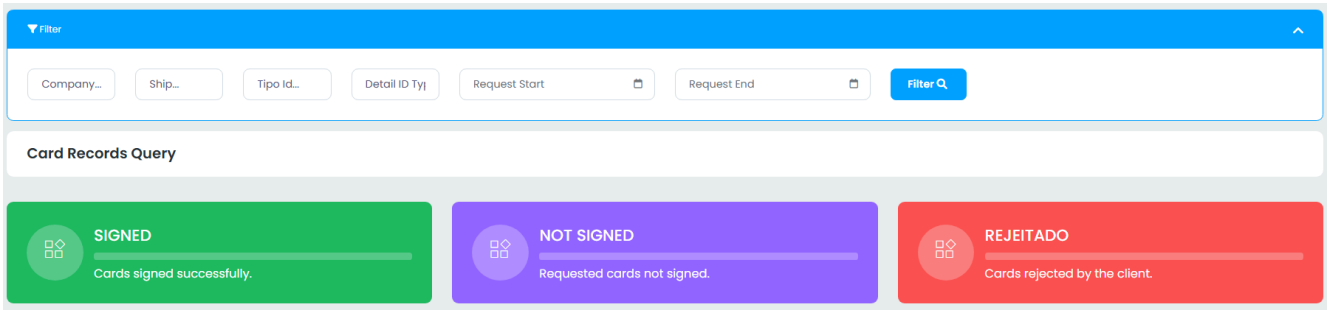

4.10 View Card

Users can view the details of the requested Cards, seeing information without the possibility of editing, signing, rejecting, or deleting.

4.11 View Consolidated Card Data

Go to **Services** → **View Consolidated Card Data** to view pie charts showing the distribution of signed, rejected, and unsigned Cards by ID detail type.

5. DocuSign Platform

The integration with the DocuSign platform simplifies the digital signing process of PDF documents in the GerCards system, as GerCards has an integration that allows seamless and quick interoperability between the two platforms. There is no need to purchase a digital certificate or complete any registrations.

DocuSign eSignature offers a 5-star mobile document signing app

Need an easy and convenient way to electronically sign contracts? Mobile devices provide the always on connectivity you need to work from anywhere. But when it comes to signing contracts online, you need to ensure you're using a trusted and secure document signing app.

The DocuSign eSignature app gives you an easy way to sign, complete and request signatures from almost anywhere, on most devices.

The DocuSign eSignature app is the #1 way to send and sign a document. Our industry-leading electronic signature app is:

- Free to all signers
- Easy-to-use
- Simple and intuitive
- Available on most devices

It's top-rated
In an increasingly mobile world, DocuSign eSignature is the mobile leader. On both the Apple App Store and the Google Play Store, the DocuSign eSignature mobile app has an average of nearly 5 out of 5 stars.
Responsive signing functionality automatically adapts documents for mobile to the size and orientation of the signer's device. No more needing to pinch and zoom around a shrunken-down PDF.

5.1 PDF Document Signing Process

To sign a PDF document through GerCards using the DocuSign platform, follow the steps below:

1. **Access to the Feature:** After logging into GerCards, access the feature from the **Services** → **My Cards** menu.

2. **Signature:** Use the **Sign Card** option available in the **Action** menu to digitally sign the document.

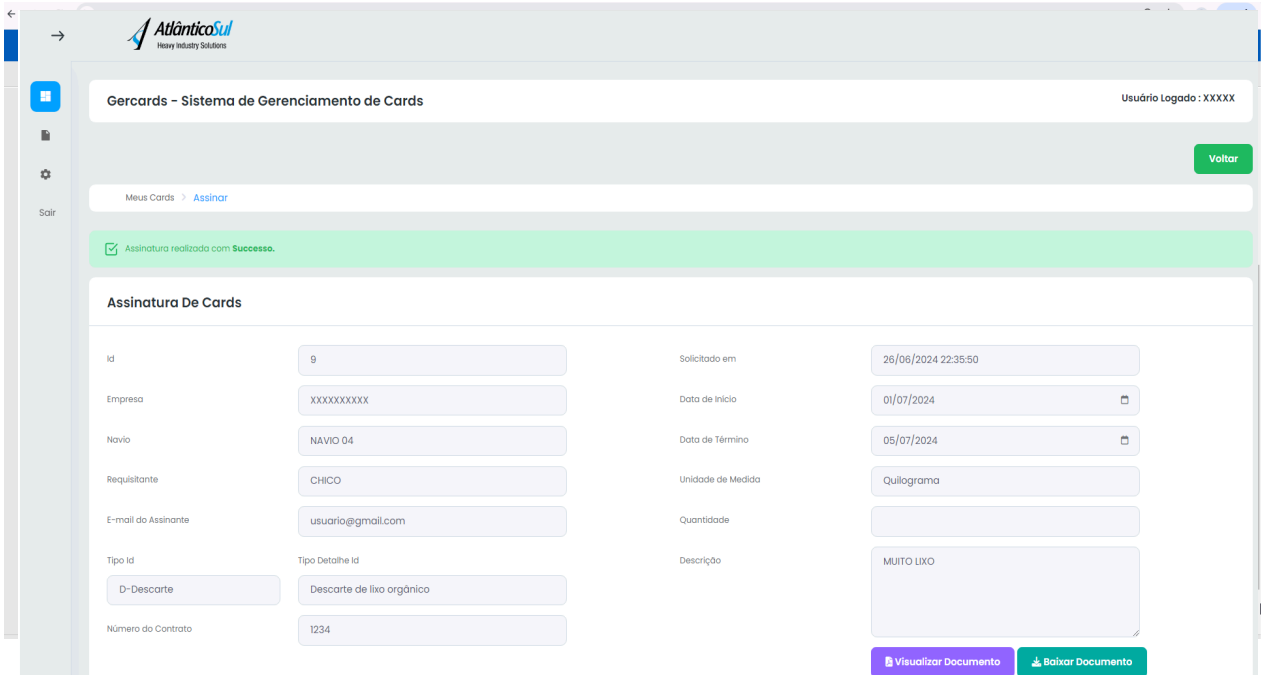

After clicking **Sign Cards**, you will be redirected to the confirmation screen and must click the **Sign** button, which will transfer you to the DocuSign platform. If this is your first time signing with the DocuSign platform, you will need to grant permission.

.
